DEPARTMENT OF
TECHNOLOGY

1. The purpose of this course is to provide students with a comprehensive understanding of the principles and practices of technology management. This includes the identification of technological opportunities, the evaluation of technological resources, and the implementation of technological solutions. The course is designed to equip students with the skills and knowledge necessary to manage technology effectively in a business context.

2. The course is structured into four main modules. Module 1, 'Introduction to Technology Management', covers the fundamental concepts and the role of technology in business. Module 2, 'Technological Innovation', explores the processes of innovation and the factors that influence technological development. Module 3, 'Technological Assessment', focuses on the methods used to evaluate the potential of new technologies. Module 4, 'Technological Implementation', discusses the challenges and strategies involved in bringing new technologies into the marketplace.

3. The course is delivered through a combination of self-paced study and interactive sessions. Students are encouraged to engage in group work and to share their experiences and insights. The course is assessed through a series of assignments, a mid-term examination, and a final project. The final project is designed to allow students to apply their knowledge to a real-world technological challenge.

4. The course is suitable for students who are interested in technology management and who have a background in business or engineering. The course is also suitable for students who are seeking to enhance their skills and knowledge in this area. The course is a valuable resource for anyone who wants to understand the role of technology in business and how to manage it effectively.

5. The course is a part of the Technology Management program at the University of the South Pacific. The program is designed to provide students with a comprehensive understanding of the principles and practices of technology management. The program is suitable for students who are interested in technology management and who have a background in business or engineering. The program is also suitable for students who are seeking to enhance their skills and knowledge in this area.
